REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance.

The present invention is directed to a system and method for managing the order of medical examination appointments and a plurality of related examination items wherein the medical examination appointments and medical examination item order/schedules are managed via waiting queues and users (e.g. patients) are provided wireless handheld devices which display thier medical examination order, medical examination and examination items waiting queues as well as dynamic maps and directions (guidance/route information) to the medical examination appointments.

More generally the present invention is directed to a system for managing the order of patients waiting for medical examinations comprising a plurality of medical examination items in order to minimize the total examination time for patients at an on-site medical facility.

The closest prior art Waytena et al., U.S. Patent No. 6,748,364, Katz, James, Simulation of Outpatient Appointment Systems (1969) and Butz, Andreas et al., A Hybrid Indoor Navigation System (2001) fail to teach or suggest either singularly or in combination maintaining an *unconfirmed state of an entire appointment process* in case an interval between a starting time of the first appointment and a completion time of an appointment for a last medical examination item becomes at least equal to a
